

COVID 19

This Guidance is Effective as of July 24 2020, and Until Further Notice

Community Garden Requirements

General Advice

Any person that uses community gardens should do so in accordance with the following requirements:

Entrance Restrictions:

1. Prohibit access to anyone who is exhibiting symptoms of COVID-19 or has had close contact with a confirmed case. Encourage people that use the garden to complete a [self-assessment](#) before going to the garden.
2. Ensure any events held at the garden follow [social gathering restrictions](#).

Maintain Physical Distancing:

1. Maintain a distance of at least 2 metres (6 feet) from other people except for members of the same household or [social circle](#).
2. Limit the number of users in a space to ensure physical distancing can be maintained. Groups of people at a site limited to 50 (indoors) and 100 (outdoors) or less. A rule of thumb is 1 person per 10 square metres.

Ensure Good Hand Hygiene:

1. If hands are visibly soiled, hand washing with soap and water is preferred. Where possible, provide hand washing stations in the gardens.
2. If not available, hands should be wiped clean before applying alcohol-based hand sanitizer (minimum 60% alcohol).
3. Perform hand hygiene before entering and upon leaving the garden.

Bring Disinfectant Supplies:

1. Recommend users bring disinfectant supplies such as water, soap, hand sanitizer and towels.
2. Provide instructions on cleaning and disinfecting frequently touched surfaces which are most likely to be contaminated. These may include hoses, door/gate handles and tools, etc. (refer to Resources Section below).

Avoid Sharing Gloves and Tools:

1. Bring your own gloves and tools and do not return gloves to any shared storage.
2. Instruct individuals who use gardening gloves to launder them after each

use.

Signage:

1. Place clear, visible signage throughout the garden — especially locations where shared equipment, tools, etc. are located— reminding users of the requirements that must be followed when using the garden to prevent the transmission of COVID-19.

Communication:

1. Recommend gardens develop and communicate (to registered members, staff and volunteers) COVID-19 policies/protocols that are specific to the community garden.
2. Update the list of current registered members, staff and volunteers, and track those who have agreed to participate under COVID-19 policies and protocols.
3. Consider using a sign-in and sign- out system to track users accessing the garden each day. This may assist with communication and close-contact tracing if required, etc.
