SERVICE PROVIDER PERSPECTIVES

Older Adult Needs

TOP OLDER ADULT NEEDS:

1. Increased Access to Geriatric Mental Health Support
2. Increased assistance maintaining property/landscaping or heavy/intense housework
3. Increased Physical Activity
4. Access to Nutrition Support

Caregiver Needs

TOP NEEDS FOR CAREGIVERS:

1. Increased information for life transition planning (e.g. moving to long term care)
2. More mental health supports to deal with caregiver stresses
3. Additional assistance coordinating medical appointments
4. Increased assistance for financial support with caregiving

"A 'one stop shop' for information for caregivers trying to coordinate services for their loved ones" - Service Provider Comment

Perspectives on Care Coordination

Strengths: Service providers reported that they feel trusted by the people they serve and feel like they are able to build a connection with the people that they serve.

Weaknesses: Service providers reported that care coordination and the referral process is not straightforward and information about community supports and health services are not clear and accessible.

"Coordination involves several phone calls to multiple service agencies, each service has their own mandate which causes barriers to service." - Service Provider Comment

Awareness, Usage, Barriers

Service providers reported that they were somewhat aware of the community support and health services available in Lambton County.

- Average reported **2.3 out of 3** Service providers most aware of support groups.
- Average reported **2 out of 3** Service providers least aware of telephone support programs.

***Pandemic:** Difficulties directly experienced due to the occurrence of the COVID-19 pandemic including lockdown, restrictions, and anxiety contributed directly to the pandemic.

***Information:** Did not know where to go or who to contact to acquire information which created difficulties accessing the service/support.

***Health:** Difficulties occurred directly due to health issues (i.e., medical complications and/or chronic medical conditions) that affected the ability to access the service/support.

***Time:** The Service/Support was not available at a time that allowed you to utilize it easily.

***Transportation:** Transportation issues (i.e., public transit, personal vehicle, caregiver vehicle) made it difficult to access services/supports.
