

Sharps Disposal

for businesses and health care providers

Businesses and health care providers are responsible for obtaining **proper sharps disposal containers** and arranging a **disposal contract** with a biomedical waste disposal company. There are many reasons that employees or clients may need to dispose of sharps (medical reasons).

Sharps containers available through Lambton Public Health are for ***personal use*** only.

What are sharps?

Sharps are items that potentially come in contact with blood or body fluids and are capable of causing a cut or puncture in the skin.

- Syringes with needles attached
- Needles
- Razor Blades
- Broken glass that come into contact with blood or other body fluids
- Smoking pipes/stems
- Lancets
